

ALEGIS CARE IN-HOME SOLUTIONS

Care that goes the extra mile
so your members don't have to

For more than 20 years, Alegis Care has been working collaboratively with health plans to extend quality care to Medicare Advantage and Medicaid members who have difficulty getting to a doctor's office.

We offer:

- **Proven in-home care model** that helps us better understand how our patients are living and gain deeper insight into their care needs. Our ability to see this total care picture leads to improved patient health and outcomes
- **Valuable support** for members who represent a significant amount of medical time and spend for your health plan
- **Flexible programs** to meet the needs of your members, your provider network, and your plan
- **Board-certified physicians and nurse practitioners** with experience in managing a broad range of medical conditions
- **Local, dedicated teams** that live in the same community as your members for a more in-depth understanding of their needs and surroundings

An inside look for better health outcomes

In addition to providing your members with more convenient access to care, we find that treating in the home also allows for a more complete perspective of members' needs – from health challenges to social issues present in their home.

As a result, Alegis Care teams are equipped with the necessary insights to develop truly personalized care plans. These care plans can positively impact members' quality of life and your overall medical spend through:

- Reduced hospitalizations
- Reduced readmissions
- Reduced ER visits
- Improved quality/HEDIS measures
- Increased completion of health risk assessments
- Increased completion of key health screenings and exams
- Closed Gaps in Care

Over the course of one year, one Alegis Care client saw:*

- ▼ **36%** decrease in admissions
- ▼ **47%** decrease in readmission
- ▼ **16%** decrease in ER visits
- ▼ **28%** decrease in medical expenses
- ▲ **26%** increase in revenue

* Alegis Care Business reporting; full-year results for 775 patients under the Chronic Care Management Program.

Programs to meet a broad range of needs – yours and your members'

In an effort to meet a variety of care and budget needs, Alegis Care offers three unique care programs ranging from direct care of members to annual screening checks for a portion of your membership.

CHRONIC CARE MANAGEMENT PROGRAM

Ideal for the top 10% of your health care utilizers, the Chronic Care Management Program is designed to assume the responsibility of a member's primary care doctor. Through this high-touch care model, Alegis Care physicians directly provide and manage members' care through multiple stages – from chronic care management to palliative care to transitional care.

COMPLEX CARE PROGRAM

Ideal for the top 15% of your health care utilizers, the Complex Care Program is designed to provide supplemental support for the members' primary care doctor. Through this collaborative care model, Alegis Care nurse practitioners follow the care directives of network primary care doctors and provide recommendations for future care based on in-home services and observations.

HEALTH RISK ASSESSMENT PROGRAM

Alegis Care staff schedules in-home appointments to conduct comprehensive assessments for Medicare Advantage and Medicaid patients. These services may include medical history and examinations, specialized tests or screenings for specific disease states, or various services to close Gaps in Care.
