

IN-HOME HEALTH ASSESSMENTS PROGRAM

Helping your members make the most of their health – and their health care.

Health assessments and preventive screenings are some of the most cost-effective ways to help your members maintain their health. But for some members, getting to the doctor's office isn't always easy. Alegis Care can help.

For more than 20 years, Alegis Care has been helping health plans complete screenings and assessments for difficult to reach members, right in the comfort of their home. *(See reverse side for program information).*

BENEFITS OF ALEGIS CARE HEALTH ASSESSMENTS

DEEPER INSIGHTS

Our in-home care model helps us better understand how your members are living as well as gain deeper insight into the environmental and social issues that impact their care needs. Our ability to see this total care picture leads to improved patient health and outcomes.

CERTIFIED, LOCAL CLINICIANS**

Your members will be seen by certified physicians, nurse practitioners and medical assistants who live in the communities they serve. We also strive to have the same provider visit the member for future assessments to increase their comfort and trust.

EXPERIENCED SUPPORT TEAMS

Our account management, outreach, and customer service teams pride themselves on working collaboratively with health plans to ensure that our assessments program provides the highest quality and return on investment possible for our clients.
