

CHRONIC CARE MANAGEMENT PROGRAM

Care that goes the extra mile so your members don't have to

For more than 20 years, Alegis Care has been helping health plans provide quality care to senior and low-income members who have difficulty getting to the doctor. Our Chronic Care Management Program is a true example of this partnership.

Through our physician-driven, high-touch care model, Alegis Care Physicians – along with 24/7 support from an entire Alegis Care health care team – directly provide and manage your members' care right in the comfort of their homes.

WHY IN-HOME CARE?

As the results show, our model of care yields improvements in utilization management and medical spend. We also find that treating in the home allows for a more complete perspective that can positively impact a member's quality of life – from health challenges to social issues present in their home.

Here are the results:*

- ▼ 36% decrease in admissions
- ▼ 47% decrease in readmission
- ▼ 16% decrease in ER visits
- ▼ 28% decrease in medical expenses
- ▲ 26% increase in revenue

The Chronic Care Management Program is ideal for the top 10% of your health care utilizers and is intended to assume the responsibility of a member's primary care doctor.
