

COMPLEX CARE PROGRAM

Extending your reach for better health and outcomes

Alegis Care works collaboratively with health plans to extend quality care to senior and low-income members who have difficulty getting to the doctor. Our Complex Care Program is a true example of this collaboration.

Alegis Care Nurse Practitioners work as an extension of your members' primary care doctors to carry out customized physician-directed care plans right in the comfort of their homes.

WHY IN-HOME CARE?

As the results show, our model of care yields improvements in utilization management and medical spend. We also find that treating in the home allows for a more complete perspective that can positively impact a member's quality of life – from health challenges to social issues present in their home.

Here are the results:*

- ▼ 33% decrease in admissions
- ▼ 42% decrease in readmission
- ▼ 8% decrease in ER visits
- ▲ 5% increase in revenue
- ▼ 28% decrease in medical expenses

The Complex Care Program is ideal for the top 15% of your health care utilizers and is intended as supplemental support for the PCP – not as a replacement.
